

Dear Families,

Today, your child learned about emergency plans, drills, and Rally Points. A Rally Point is the location where all children and staff gather in the event of an emergency. Children were given the opportunity to identify different routes they could take to get to the Rally Point, and they discussed which one is the fastest and safest route. It is important to hold drills to practice emergency procedures so children can become familiar and comfortable with the procedures outside of an emergency situation. Children will be practicing drills throughout the school year. This learning can be extended at home by coming up with an emergency plan for your family and a Rally Point where the family could gather in the event of an emergency.
