

Create a Culture of Safety in Your School Community with Anonymous Reporting System

Powerful Software that Helps You Prevent the Preventable

Navigate360 Anonymous Reporting System empowers students and community members to contribute to a safe and responsive learning environment by providing a trusted platform to share information anonymously. This level of collaboration is necessary to foster a culture of safety where students can speak up without fear of repercussions and school safety teams are equipped to prevent harm before it occurs.

Community Empowerment & Engagement

Engage your entire community in the work of student safety. Collect information through real-time, two-way anonymous dialogue with those reporting threats, and facilitate collaboration within a connected network of users.

Easy Reporting & Timely Response

Equip students, staff, and family to report incidents anytime, anywhere with mobile app access, and ensure timely response and management of reported information by school safety and culture teams.

Data Security & Reliability

Trust that your community's sensitive data is protected. With a flawless track record of zero data breaches, over 99% platform availability, and SOC 2 Type II compliance rating, Anonymous Tipline & Reporting ensures the confidentiality and integrity of reported information.

Since 1998, Navigate360 Anonymous Reporting System has led the way in empowering students to share what they know to save lives, solve crimes, and prevent harm.

Layered Integrations

School safety and student well-being require a layered, holistic approach to reassure your community that situations are treated seriously and interventions maintained with fidelity. A key component of this is utilizing threat management solutions that integrate for more effective and efficient support. Together, Navigate360 Reporting System, Navigate360 Behavioral Case Manager, and Navigate360 Digital Threat Detection provide a unified solution for identifying and addressing threats of violence, self-harm and suicide ideation, substance abuse, bullying, and more.

These integrations are designed to address a crucial question: How are you managing community concerns to ensure it translates into effective, evolving support? Digital Threat Detection allows you to meet students where they are - online - and identify students in need of support. By centralizing information about situations of concern, Behavioral Case Manager equips teams to conduct threat assessments and suicide screenings while also managing behavior interventions to effectively support student well-being and documenting all actions taken.

Set a course for zero incidents.

Take a layered, holistic approach to school safety with Navigate360 technology, training, and guidance to move you closer to your goal.
